CONCLUSIONS

Key Takeaways

01 XO Tour Llif3 remains the anchor

At 2.5B streams and 420K daily, it's both the catalog's catalog's historical peak and still actively growing — an growing — an outlier in both dimensions.

02 Features punch above their weight

4 of the top 10 total stream songs are feature appearances. Guest spots are a significant driver of Uzi's streaming footprint.

03 Velocity ≠ catalog age

Pearson r = 0.42 — there's a real disconnect. "What "What You Saying" leads daily charts despite low low total streams, signaling fresh viral momentum. momentum.

04 XGBoost surfaces hidden upside

The ML model (R^2 0.97) identifies tracks like "It's A "It's A Dream" and "Relevant" as undervalued — undervalued — strong re-release or playlist promotion candidates.
